DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 42-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wu et al. (US 4,859,619) in further view of Ho (US 4,954,214).

Wu discloses the steps of:

first MISFETs (65, fig. 6) arranged in said first portion;

second MISFETS arranged in said second portion;

a plurality of conductor plugs (81, fig. 7) formed in said insulating film in said first and second portions;

a first conductive strip (81, fig. 7) formed on said insulating film in said first portion and electrically connected to one of a source and a drain region of said first MISFETs by said conductor plugs; and

a second conductive strip (81, fig. 7) formed on said insulating film in said second portion and electrically connected to one of a source and a drain region of said second MISFETs by said conductor plugs (col. 4, ln. 39 – col. 5, ln. 22).

Wu discloses the claimed limitations except wherein the second opening in the second insulating film is formed over the first conductor plugs formed in one of said first

openings in the first insulating film or the specific materials of the conductor plugs. The examiner *takes official notice* that forming the second opening over the first conductor plug is a matter of design choice, because photolithographic techniques can form opening anywhere one skilled in the art prefers to put them (see Ho fig. 4c; col. 8, lns. 35-45) and also the materials used are commonly known to be used in interconnect processing.

Response to Arguments

1. Applicant's arguments with respect to claims 42-49 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
